HERPETOLOGY - THE STUDY OF REPTILES AND AMPHIBIANS

July 12th

Learn to ID our threatened Massasauga Rattlesnake, how to treat a bite, test your frog skills, and make your very own wooden snake.

HABITAT BOX BUILD

Our endangered Red-Headed Woodpecker needs your help. Their habitat of Oak Savannah forests is ultra rare so we will build habitat boxes to distribute across the Saugeen Peninsula to help them successfully raise their young!

July 15th

July 19th

TURTLES ON THE MOVE!!

Learn how to rescue these cool little dudes off the road. We will talk about the risks they face and build nest cages to protect their eggs from predators.

MISSION MONARCH

Learn about the life cycle of the endangered monarch butterfly & the importance of pollinator plants in our ecosystem. Build a bug hotel and native seeds to take home for your own garden.

HABITAT BOX BUILD

Our endangered Red-Headed Woodpecker needs your help. Their habitat of Oak Savannah forests is ultra rare so we will build habitat boxes to distribute across the Saugeen Peninsula to help them successfully raise their young!

ONTARIO OWLS

Ruling the top of the food chain are Ontario's Owl species. Learn to ID them by sound, and check out what they eat by dissecting a pellet in search of the tiniest of skulls.

August 19th

August 20th

BUSHCRAFT DAYS

Learn the 5 C's of survival while we practice building shelters, safe knife handling, backwoods fire safety, and all the uses Paracord can provide. Will your team have the skills to survive the wild? Participants will make their own Paracord bracelets to take home.

HAVE AN IDEA TO HELP? PITCH IT

We encourage youth involvement in planning our projects. Do you have a favorite species that could use some help? Let us know and we will look for funding to accomplish your mission!

THANKSGIVING WEEKEND IS BAT WEEK - JOIN US FOR OWL PELLET DISSECTIONS. MORE INFO COMING SOON.
